

AMRDEC SAFE ACCESS FILE EXCHANGE (SAFE)

Safe can be used for free by both contractors and vendors to exchange files that exceed the AFWay 12MB size and 10 attachment documentation limits. SAFE is a simple file sharing alternative because user accounts are not required; therefore, anyone can use SAFE.

-SAFE is an alternative for the contracting community to send large files to vendors and for vendors to send large files to contracting officers.

-SAFE is a file sharing system hosted by the Army at Redstone Arsenal.

-Users can upload 25 documents with a total 2GB limit.

-SAFE has an ATO from the Army and has 128-bit encryption security.

--Approved by Army IO to share FOUO and Privacy Act files.

-How to use SAFE

--Enter email address

---If using an email other than .mil or .gov, the sender will receive an email and must complete a verification step. All .mil or .gov email addresses are seamless

--Upload documents (files are virus scanned)

--Enter recipient's email (multiples allowed)

--Optional to add FOUO or Privacy Act Statement

--Recipient receives email notification with URL and password

---The email is not unsafe, if the user would email the documents anyway, no harm

--Recipient can view and download files

--Senders can receive email notification of recipient's download

-SAFE is not a permanent repository, there is a 14 day maximum files are available; afterwards, they are purged and no longer visible.

-SAFE was tested with notification times of less than 15 minutes.
