

## NetOps and Infrastructure Solutions Task Order (TO) Data Item Descriptions (DID)

### Purpose:

The following list provided possible Data Item Descriptions (DID) Deliverables to be used for NETCENTS-2 NetOps and Infrastructure Solutions Task Orders (TO). If DID is on the list, then the corresponding sequence number must be used. The following DIDs are representative of those that may be dictated by an individual TO. This list is not meant to be exhaustive or inclusive of all that may be required, referenced, or otherwise identified within a given TO. The government TO Manager, if desired, may require that a CDRL comply with a specific DID or Military Standard, even if a DID or Standard has been rescinded, cancelled, or exists only in a draft form. The government TO Manager may likewise require the contractor to comply with an identified industry or commercial standard or request contractor format or utilize existing contractor data.

The following guidelines shall be used when compiling your deliverables list:

- If a DID is listed please use the corresponding sequence number
- If a DID is not listed, please refer to Appendix E4 of the NC-2 EISM User Guide to determine if the deliverable is listed and use the corresponding sequence number.
- CDRLs that are separately priced must use the same sequence number, except the sequence number must start with a "B."
- If a DID is not on this list then create sequence numbers starting after the last number on the list (i.e. A080, A081, etc.).
- CDRLs with a sequence number starting with an "A" (A001, A002, etc.) are not separately priced.
- CDRLs with a sequence number starting with an "B" (B001, B002, etc.) are separately priced.

For detailed CDRL instructions see DoD 5010.12-M Procedure for Acquisition and Management of Technical Data:
