

Company Overview

Shearwater Mission Support, LLC (SMS) is an SBA-Approved 8(a), Small Disadvantaged Business (SDB) Mentor-Protégé Joint Venture (JV) Company, delivering the combined capabilities and past performance of two well-established and high performing Government contracting firms, Shearwater Systems, LLC (Shearwater) and TechFlow, Inc (TechFlow).

Shearwater is an 8(a)-certified, Alaska Native Corporation (ANC)-Owned, Small Disadvantaged Business (SDB), with headquarters in Anchorage, AK and operating from Manassas, VA. Shearwater is a wholly-owned Subsidiary of Three Saints Bay, LLC which is a holding company for 11 operating service companies in the Old Harbor family of companies.

TechFlow is Shearwater's Mentor company, headquartered in San Diego, CA with offices in Crystal City, VA and Albuquerque, NM. TechFlow is 100% employee-owned—TechFlow employees don't just work for the company, they own the company. This motivates and inspires our personnel to produce meaningful thought leadership and deliver enduring solutions to our customers.

ALWAYS AHEAD

SMS has been developing leading-edge solutions for customers in mission critical markets. Founded at the start of the dot-com revolution, TechFlow helped large commercial firms such as DreamWorks, Toshiba, MGM, and others modernize their business systems using what has become known as Scaled Agile Development. Today, with deep operational roots in the bi-coastal innovation hubs of California and National Capital Region, SMS continues to serve an important purpose – helping businesses and government agencies modernize and optimize their systems to keep pace with the fast-changing technology landscape. We challenge the status-quo and tirelessly explore new ways to do things better, faster, and more cost effectively.

SMS offers IT modernization, business integration, cloud and mobile solutions. With a focus on agile methodologies and DevSecOps techniques, we are able to accelerate implementation and delivery of our services. And, with in-depth expertise in cybersecurity, we make sure every solution is resilient against emerging and evolving adversary threats. Our combination of technical innovation and pragmatic execution unleashes new capabilities, bolsters security, and transforms service delivery.

SMS supports national security with leading-edge integrated logistics support. From deployment and certification of equipment to supply chain and technical field service, we resolve inefficiencies and reduce operational costs while keeping the American public safe and secure.

SMS provides comprehensive base operations, facilities management, range support, energy effectiveness, and mobility solutions. We use leading-edge predictive analytics methods & tools and flexible, creative approaches to proactively resolve issues that lead to measurable efficiencies for bases, facilities and range operations.

Commitment to Our Community

SMS supports the members of the Old Harbor Native Alaskan community that we represent by helping to provide employment opportunities and economic dividends. We also participate in and develop initiatives to support the local communities where we operate and work.

Always Innovating

Never satisfied with just “keeping up,” we are constantly finding better ways to institutionalize continuous improvement of operations.

Always Agile

We've mastered the art of scaling the agile workflow, remaining nimble to ensure we can meet the most rigorous demands while staying within cost constraints. We streamline your path to success.

Always Proactive

We take a future-minded approach - getting ahead of problems before they start and identifying opportunities to optimize. We want to help shape the government of the future through solutions that deliver today, and prepare for tomorrow.

As Heard From Our Customers

“The contractor has gone above and beyond the contract requirements for quality.”

Army Yuma Proving Ground

“Moved GSA further along in Agile methodology than just about every other division... TechFlow built upon that to move the team to the Scaled Agile Framework methodology - again well ahead of others.”

GSA

“Services provided on this contract are spot-on. Outstanding Support!”

U.S. Marine Corps

“Exceptional performance with 100% of deliverables meeting the acceptable quality levels, exceeding the threshold.”

U.S. Navy

SMS Certifications

Project Cameos

We are leading a multi-year, multi-phase contract to demonstrate distinctive technologies for NETCOM Advanced Capability Engineering Directorate (ACED) focused on Army installation networks to optimize their behavior, streamline configuration, provide holistic defense, and new capabilities for cyber-operations in support of Department of Defense Information Network (DoDIN) Operations.

We are executing \$976M effort to implement and operate a comprehensive performance based logistics (PBL) program to sustain Government-certified Explosives Detection Systems (EDS) deployed and operated by TSA at 300 airports and government-designated facilities throughout the United States and its territories.

We are supporting GSA’s Technology Transformation Service (TTS) to maintain and prove Cloud.gov platform. This contract will continue to support Cloud.Gov’s security posture, FEDRAMP Authorization and extensibility for modernization. Cloud.Gov enables agencies to significantly speed up the development and the deployment of cloud applications leading to faster government modernization efforts.

We are supporting DIA in upgrading and modernizing their systems to combat cyber threats from Nation states. Agile software development methodology is being leveraged to modernize and enhance DIA’s ability to process and act on global information by tapping high-level skills in data analytics and data science, deep programming, and artificial intelligence to keep the agency ahead of its adversaries.

SMS is helping operate and maintain one of the largest military installations in the world, The U.S. Army Yuma Proving Ground. Covering over 1,300 square miles of desert terrain and 2,000 miles of restricted air space, this isolated geography permits numerous test and training activities to take place, with an average of 60 to 90 tests occurring each week. Nearly every weapon in the ground combat arsenal is tested here, significantly improving combat readiness and resilience.
